HUMAN DIMENSIONS OF THE ENVIRONMENT

INSTRUCTOR:
Dr. Susan Crate

SPRING 2021
3 CREDITS

ONLINE
SYNCHRONOUS

M 4:30 – 7:10 PM

In this course, we will grapple with issues of human and planetary survival and focus on positive change. We will explore our own environmental values, develop our environmental literacy and a capacity for place-based ecology, and investigate various ways that we can be involved in “The Great Turning,” the transition from the Industrial Growth Society to a Life-Sustaining Society. We will develop a biospheric perspective, an awareness of our planet’s terrestrial system– including air, food, shelter and water– in which life develops. In tandem, we will also develop an understanding of the ethnosphere, the full complexity and compliment of human potential as brought about by culture and adaptation since the dawn of consciousness.
