

EVPP 378/BIOL 379:

Ecological Sustainability

INSTRUCTOR:
Dr. Changwoo Ahn

SPRING 2022
4 CREDITS

Tues & Thurs
3:00 - 4:15 PM
Face to Face

LAB/FIELD
Wednesdays
1:30 - 4:10 PM

The course (R&S and Greenleaf-designated) is to develop critical reading and thinking skills related to several subjects in ecological sustainability. Students learn about ecosystem's ability to self-organize as they develop over time and respond to management and disturbance. Extensive literature review and field trips/field project will help students gain strong ecological literacy and design practices to improve ecological sustainability. The main theme includes soil carbon and color relations in green spaces on and around the campus.
