

EVPP 430 (03 credit)

Fundamentals of Environmental Geographical Information Science Spring 2024

[Course Description](#) | [Required Textbooks](#) | [Course Learning Outcomes](#) | [Technology Requirements](#) | [Course Schedule](#) | [Assignments Description](#) |
[Course Policies](#) | [Grading Scale](#) | [University Policies and Resources](#) |

Instructor: Dr. Vivek Prasad

Email: vprasad1@gmu.edu (required contact)

Meeting class room: Innovation Hall 319

Phone: Zoom; please request a meeting via email.

Office hours: Monday: 6:00 PM -7:00 PM, by appointment, please email me in advance.

Course Meets: Tuesday and Thursday, 7:30 AM-8:45 AM EVPP 430 and 505 co-meet

A few meetings may be synchronous, which the Instructor will assess based on the class's progress and will inform the students in advance. Also, the Instructor will be available for tutorials on Wednesday and Thursday, 7 PM – 8PM based on the prior email and convenience.

First Day of Fall Class: Tuesday, Jan 16

Last Day to Drop: With 100% Tuition Refund Jan 30

Last Day to Drop: With 50% Tuition Refund Feb 6

Spring Break (Classes Do Not Meet) Mon. Mar 4 - Sun. Mar 10

Source: https://registrar.gmu.edu/calendars/spring_2024/

Course Description

Geographic Information Science (GIS) has emerged as a powerful data visualization and analysis discipline. This course investigates how GIS is currently being used to understand better and address environmental problems, as well as manage and conserve natural resources.

The lectures discuss the basic and current applications of GIS in the environmental dataset, maps, modeling, and analysis and impediments to GIS. Environmental GIS dataset deals with several applications, from the simple Digital Elevation Model to the Landuse Land-change, or Solar Analysis. Specific topics include climate change, biodiversity conservation, forest management, soils management, agriculture, natural hazards, water resources, environmental challenges in the urban environment, and alternative energy. The lectures in this course summarize recent progress and identify key research issues concerning the integration of GIS and environmental dataset. Students will have the opportunity to conduct their independent research or work on case studies relevant to the course topics, using GIS data.

Blackboard Login Instructions

Access to [MyMason](#) and GMU email are required to participate successfully in this course. Please make sure to update your computer and prepare yourself to begin using the online format BEFORE the first day of class. Check [the IT Support Center](#) website. Navigate to [the Student Support page](#) for help and information about Blackboard. In the menu bar to the left you will find all the tools you need to become familiar with for this course. Take time to learn each. Make sure you run a system check a few days before class. Become familiar with the attributes of Blackboard and online learning.

Required Textbooks

Readings supplied by Instructor and posted on the Blackboard (for each specific topic starting from Jan 16 Link:

<https://mymasonportal.gmu.edu/>

1. Journal articles, documents, and required data will be provided during the course.
2. Students are required to have a more than 8 GB USB for data and lab project storage and retrieval.
3. ArcGIS Pro will be provided at the beginning of the semester. You should install it on your computer.

Course Learning Outcomes

In this course, students will learn to:

1. Describe how GIS deals with environmental problems,
2. An integrated approach with the geodatabase,
4. Discuss the role of GIS in environmental applications,
5. Describe the current GIS environment and topics of current interest in sustainable energy,
3. Develop a project using a GIS.

Technology Requirements

Hardware: You will need access to a Windows or Macintosh computer with at least 2 GB of RAM and access to a fast and reliable broadband internet connection (e.g., cable, DSL). A larger screen is recommended for better visibility of course material. You will need speakers or headphones to hear recorded content and a headset with a microphone is recommended for the best experience. For the amount of Hard Disk Space required taking a distance education course, consider and allow for:

1. The storage amount needed to install any additional software and
2. Space to store work that you will do for the course.

If you consider the purchase of a new computer, please go to [Patriot Tech](#) to see recommendations.

Software: Many courses use Blackboard as the learning management system. You will need a browser and operating system that are listed compatible or certified with the Blackboard version available on the [myMason Portal](#). See [supported browsers and operating systems](#). Log in to [myMason](#) to access your registered courses. Some courses may use other learning management systems. Check the syllabus or contact the Instructor for details. Online courses typically use [Acrobat Reader](#), [Flash](#), [Java](#), and [Windows Media Player](#), [QuickTime](#) and/or [Real Media Player](#). Your computer should be capable of running current versions of those applications. Also, make sure your computer is protected from viruses by downloading the latest version of Symantec Endpoint Protection/Anti-Virus software for free [here](#).

Students owning Macs or Linux should be aware that this course use software that only runs on Windows. You can set up a Mac computer with Boot Camp or virtualization software so Windows will also run on it. Watch [this video](#) about using Windows on a Mac. Computers running Linux can also be configured with virtualization software or configured to dual boot with Windows.

Note: If you are using an employer-provided computer or corporate office for class attendance, please verify with your systems administrators that you will be able to install the necessary applications and that system or corporate firewalls do not block access to any sites or media types.

Course-specific Hardware/Software

Check the syllabus for your course or contact the Instructor prior to the start of the course to find out about specific technical requirements for your class. Hardware or software required for your course or program may be available for purchase at [Patriot Computers](#) (the University's computer store that offers educational discounts and special deals).

ArcGIS Pro will be provided before the course starts and students will install on their computer. Instructor will provide installation guidelines.

Course Schedule

Dates	EVPP 430 and 505 TOPIC	ASSIGNMENTS DUE
	Basics of GIS and its applications in Environmental problems	
Jan 16	Introduction, Syllabus, Class Format Information.	
Jan 18	Introduction to GIS. What is a GIS? How to start ArcGIS Introduction to GIS. What is a GIS? Installation of ArcGIS Pro	Read the slide and reading material
Jan 23	Introduction to GIS. What is a GIS? Installation of ArcGIS Pro	Read the slide and reading material
Jan 25	Mapping GIS data, Attribute files Queries, Reference system	Read the slide and reading material
Jan 30	Data search and working with attribute table	HW1: Working with attribute table and queries
Feb 1	The geodatabase for the environmental data Creating and Integrating Data for Natural Resources Application-Basic commands	HW 2: Gulf of Mexico oil spill analysis

Dates	EVPP 430 and 505 TOPIC	ASSIGNMENTS DUE
	Working with Raster and remote sensed data to solve environmental problems.	
Feb 6	Habitat Analysis: GIS, Spatial Analysis and Modeling Overview Spatial Representation and Temporal Dynamics in Environmental GIS	HW 3: Habitat location
Feb 8	Google KML: Importing Exporting from KML	HW4: Impact study of Alaska oil development and climate change
Feb 13	Spatial analysis tool, Surface Exploring the digital elevation model	Practice assignment
Feb 15	Application of GIS in Solving Environmental Problem Raster images to monitor quality and quantity	Practice assignment

Dates	EVPP 430 and 505 TOPIC	ASSIGNMENTS DUE
	Application of remote sensing in solving environmental problems (with focus on NASA, USGS, and European Space Agency data)	
Feb 20	Landuse change and Watershed GIS Landuse change, Landuse interpretation (Part 1)	Practice
Feb 22	Landuse change, Landuse interpretation (Part 2)	HW5: Downloading remote sensed data and processing (e.g., land classification) Two parts assignments (working with Landsat data and Sentinel 2 data)
Feb 27	Landuse change, Landuse interpretation (Part 3)	
Feb 29	Climate modeling using NetCDF data	HW 6: climate modeling using NetCDF data
Mon. Mar 4 - Sun. Mar 10	Spring break	
March 12	Calculating solar energy potential of rooftops of GMU campus	HW 7: calculating solar energy potential of rooftops of GMU campus

Dates	EVPP 430 and 505 TOPIC	ASSIGNMENTS DUE
March 14	Climate Change - The CO2 sequestration	Reading and practice assignment
March 19	Solar analyst extension - Exploring the solar energy Calculating Solar Radiation Using Solar Analyst	Literature review
	Special topics and case studies to solve environmental challenges using spatial data	
March 21	Marine GIS	HW 8: GPS data and tracking shark for conservation
March 26	Online, no class meeting	Mid-term exam
March 28	Special topic: working with night-light data (NASA)	HW 9
April 2	Special topic: Working with European Satellite data	HW 10
April 4	Special topic: Introduction to Map Story	Practice Assignment
April 9	Special topic: Introduction to data extrapolation	Practice Assignment
	Final project preparation, Instructor will be available on Zoom to help students	
April 11	Special topic: Introduction to data extrapolation	Practice Assignment

Dates	EVPP 430 and 505 TOPIC	ASSIGNMENTS DUE
April 16	Students work on their assignment under Instructor's supervision	Final Paper preparation
April 18	Students work on their assignment	Final Paper preparation
April 23	Students work on their assignment	Final Paper preparation
April 25	Students work on their assignment	Final Paper preparation
May 2	Students work on their assignment	Final Paper submission
May 7	TBD	
May 9	TBD	

Assignments Description

	Assignments	Grade
1	Literature review (430 # 2)	10
2	Homework 430 # 8	60
3	Mid-term exam	15
4	Final project and I will post more information on this on the Blackboard	20

Homework:

During this semester we will have eight computer exercises that are to be completed inside the structures class time. These exercises are designed to understand the capabilities and techniques used in Environmental GIS. The software and data required for those exercises will be provided during the lessons, and each of them covers the topic of the lecture. You can use the data and the software at home if you already have GIS software installed on your computer. You might work together with classmates on computer exercises if you wish, but the responses submitted must be your own, through a blackboard. All the material and the dataset will be available on the blackboard. You download the dataset, and you answer the questions directly on the section of the blackboard.

Late homework policy:

Homework is due by 11:49 PM on the specified due date. Homework is accepted up to 2 days late. Each day late incurs a 10 point penalty (including weekend days). There are NO exceptions to this policy.

Final GIS Project:

Select an application of GIS technology that you are interested in. Design your project to answer a problem by using GIS analysis.

Components of this project should include:

1. a problem statement
2. a description of data used
3. a step-by-step description of the methodology employed, also, list number of GIS tools you used
4. the result in a graphic and/or tabular form
5. your evaluation of the analysis, including how it could be improved
6. references

A brief guideline will be provided during the second class of the course. Graduate students will add extra tools and complexity to the final project.

Literature review

During the semester students are required to identify two key research papers, using GMU e-library. The paper should be on the application of GIS to find an environmental solution and are related to the course objectives. Prepare a 500 words write-up on each paper. The write-up should have segments: research question, methodology, finding, and weakness of the paper, and citation.

Mid-term

The mid-term will be an online closed-book exam. The online exam will have multiple-choice questions. The Instructor will explain and will post the guidance on the Blackboard.

Course Policies

Late Assignments: All assignments must be turned in on the due date given on the assignment sheet.

Instructor-Student Communication: I will respond to your emails within 48 hours. If I will be away from email for more than one day, I will post an announcement in the Blackboard course folder. Before sending an email, please check the following (available on your Blackboard course menu) unless the email is of a personal nature:

1. Syllabus
2. Ask Professor

Feel free to respond to other students in the Ask Professor forum if you know the answer.

Technology. You will need a reliable computer and internet access to view course materials in Blackboard. You will need to video record your two role-plays and you can do that with a smartphone or other video camera, such as Kaltura CaptureSpace in Blackboard.

Grading Scale

F	<63
D	64
C-	70
C	73
C+	77
B-	80
B	83
B+	87

A-	90
A	93
A+	94+

University Policies and Resources

- a. **Academic Honesty:** You are expected to be familiar with and abide by the University's Honor Code. The Code can be found [here](#). It is your responsibility to see me if you have questions about these policies. George Mason University has an honor code that states the following:
To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the University Community have set forth this:
- b. Students must follow the university policy for [Responsible Use of Computing](#)
- c. **Student services:** The University provides range of services to help you succeed academically and you should make use of these if you think they could benefit you. I also invite you to speak to me (the earlier the better).
- d. Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- e. [The George Mason University Counseling and Psychological Services \(CAPS\)](#) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance. Counseling Center: Student Union I, Room 364, 703-993-2380.
- f. Students with disabilities who seek accommodations in a course must be registered with the [George Mason University Office of Disability Services \(ODS\)](#) and inform their Instructor, in writing, at the beginning of the semester. All academic accommodations must be arranged through that office. Please note that accommodations **MUST BE MADE BEFORE** assignments or exams are due. I cannot adjust your grade after the fact.
- g. Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the Instructor.
- h. [The George Mason University Writing Center](#) staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing. University Writing Center: Robinson Hall Room A114, 703-993-1200. The writing center includes assistance for students for whom English is a second language.
- i. **Diversity:** George Mason University promotes a living and learning environment for outstanding growth and productivity among its students, faculty and staff. Through its curriculum, programs, policies, procedures, services and resources, Mason strives to maintain a quality environment for work, study and personal growth.
