SUSTAINABILITY
DIR. GREG FARLEY

Fall 2022
1 credit

10 Thursdays, 3:00-4:15pm
In Horizon Hall rm. 4012

CRN: 82962 (undergraduate)
83454 (graduate)

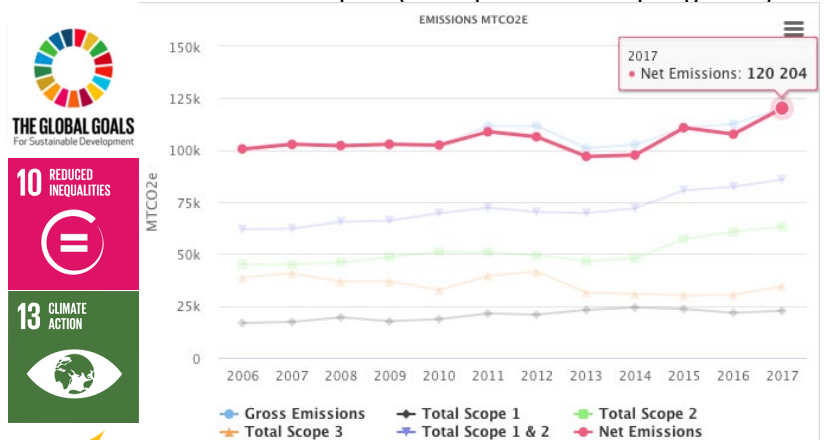

Make an impact at Mason!

HELP MASON TO DESIGN A JUST, EQUITABLE CLIMATE ACTION PLAN FOR 2030:

We examine socioeconomic & ecological inequities which may arise from or be exacerbated by climate change. This includes equity issues related to climate itself, plus climate mitigation, adaptation & resilience to changes in our climates. After examining case studies across sectors (e.g., housing, food systems, higher education) and regions of our world, we turn our attention to how we could help to ensure that Mason's next climate action plan is both equitable and accountable to its stakeholders and customers, including students. The resulting policy recommendations will be conveyed to the University's Office of Sustainability for consideration in Mason's second climate action plan (to be published in spring 2023).

Department of Environmental Science and Policy

How are Benefits & Burdens of our changing climates shared equitably among people (& species)?
