

# EVPP 490:

## URBAN SMART SUSTAINABLE GROWTH STRATEGIES

DR. WILLIAM  
ROPER

LECTURE ON-LINE

SUMMER 2022  
A SESSION

DEVELOP NEW  
SKILLS USING GREEN  
DESIGN CONCEPTS  
FOR SMART  
SUSTAINABLE  
GROWTH

- Leveraging public transportation, walk-ability, biking and parking policy – smart streets
- Green space protection, parks, recreational areas & farmers markets
- Providing a spectrum of housing availability
- Integration of office, retail & housing spaces
- Reduction in the urban pollution footprint
- Use of recycled, reusable, green & sustainable products—lower carbon footprint – LEED Buildings
- Urban applications of renewable solar & wind energy-reduction in greenhouse gases
- Low – impact storm water management practices
- Urban water resource management, energy efficiency, resource conservation & more
