

EVPP 505 - 201:

The Diversity of Fishes Lab

INSTRUCTOR:
T. Reid Nelson

Spring 2022
1 CREDIT

Face to Face
Instruction

Potomac Science
Center

Tuesdays
3:30 – 6:15 PM
(flexible)

**With over 27,000 species,
the diversity of fishes is vast!**

- Explore the wide array of external and internal anatomy of fishes
- Gain insight into popular techniques in fisheries science such as otolith extraction and aging
- Become familiar with major fish families working through our inhouse collection of over 900 specimens
- Learn local fishes order, family, genus, species, and common names an invaluable skill for aquatic natural resource employment
- Become familiar with collection, preservation, and storage techniques during field trips
