IN PERSON  
AND/OR ONLINE  
SYNCHRONOUS

Tuesdays  
7:20PM– 10:00PM

Arlington Campus

How to measure  
the value of  
nature  
?

**Economics is fundamental to environmental policy.** From the EPA, to NOAA, to USDA, economists have a more significant influence than any other social science discipline. This course will provide a foundational understanding of the role of economics.

### Topics include:

- Sustainable development and tradeoffs: is growth bad for the environment?
- Resource management and pollution: the role of property rights.
- How do we put \$\$\$ values on the environment? Should we even try?
