EDUCATION

INTERNATIONAL SPACE UNIVERSITY (ISU), Strasbourg, France
M.S. Space Studies July 1997
Project: "Space-based Navigation with NAVSTAR GPS"

RADBOUD UNIVERSITY, Nijmegen, Netherlands
Ph.D. Physics and Mathematics December 1985
Thesis: "Magneto-optical Studies of Quantum Wells and Superlattices"

KARL FRANZENS UNIVERSITY, Graz, Austria
M.S. Physics February 1982
Thesis: "Intra-band Transitions in $Pb_{1-x}Ge_xTe$"

TEACHING EXPERIENCE

GEORGE MASON UNIVERSITY August 2023 – present
Instructional Associate Professor, Department of Physics and Astronomy, Fairfax, VA

Lecture courses developed:
Physics 310 Semiconductor Materials and Processing Technology

Lecture courses taught:
PHYS 243 College Physics I, Summer 2024, 2025, Fall 2023, 2024
PHYS 245 College Physics II, Summer 2024, 2025, Spring 2024, 2025
ASTR 111 Solar System, Fall 2023, 2024
ASTR 113 Stars, Galaxies, and Universe Spring 2024, Spring 2025
PHYS 310 Semiconductor Materials and Processing Technologies, Spring 2025

Laboratory courses taught:
PHYS 246 College Physics Lab II, Summer 2024, 2025
PHYS 311 Instrumentation, Fall 2023, 2024

Online laboratory courses taught:
ASTR 112 Introductory Astronomy Lab: Summer 2024, 2025

Lab Coordinator:
PHYS 244 College Physics Lab I, Fall 2023, 2024, Spring 2024, 2025, Summer 2024, 2025
PHYS 246 College Physics Lab II, Fall 2023, 2024, Spring 2024, 2025, Summer 2024, 2025
ASTR 112 Solar System, Fall 2023, 2024, Spring 2024, 2025, Summer 2024, 2025
ASTR 114 Stars and Galaxies, Fall 2023, 2024, Spring 2024, 2025, Summer 2024, 2025

GEORGE MASON UNIVERSITY August 2016 – July 2023
Instructional Assistant Professor, Department of Physics and Astronomy, Fairfax, VA

Lecture courses developed:
ASTR 111 Online version

Laboratory courses developed:
PHYS 311 Instrumentation
PHYS 244 College Physics I online version
PHYS 246 College Physics II online version

Online laboratory courses taught:
ASTR 112 Introductory Astronomy Lab: The Solar System, Fall 2016, 2017, 2018, 2019, Summer 2018, 2019, 2020, 2021, 2022, Spring 2022
ASTR 114 Introductory Astronomy Lab: Stars and Galaxies, Spring 2017, 2018, 2019
PHYS 311 Instrumentation, Fall 2020
PHYS 244 College Physics I Lab, Fall 2021, Spring 2021
PHYS 246 College Physics II Lab Fall 2020, Summer 2020, 2021, 2022

Lecture courses taught:
PHYS 243 College Physics I, Summer 2017, 2018, 2019, 2020, 2021, 2022, Fall 2017, 2018, 2019, 2020, 2021, 2022
PHYS 245 College Physics II, Summer 2017, 2018, 2019, 2020, 2021, 2022, 2023 Spring 2017, 2018, 2019, 2020, 2021, 2022, 2023
PHYS 260 University Physics II, Summer 2017
ASTR 111 Solar System, Fall 2020, 2021, 2022 Spring 2020, 2021, 2022
ASTR 113 Stars, Galaxies, and the Universe, Spring 2023

Laboratory courses taught:
PHYS 244 College Physics Lab I, Fall 2016, 2017, 2018, 2019, Spring 2020
PHYS 246 College Physics Lab II, Spring 2017, 2018, 2019, Summer 2018, 2019, 2020, 2023
PHYS 311 Instrumentation, Fall 2017, 2018, 2019, 2021, 2022

Lab Coordinator:
PHYS 244 College Physics Lab I, Fall 2016, 2017, 2018, 2019, 2020, 2021, 2022 Spring 2017, 2018, 2019, 2020, 2021, 2022, 2023, Summer 2018, 2019, 2020, 2021, 2022, 2023
PHYS 246 College Physics Lab II, Fall 2016, 2017, 2018, 2019, 2020, 2021, 2022, Spring 2017, 2018, 2019, 2020, 2021, 2022, 2023, Summer 2018, 2019, 2020, 2021, 2022, 2023
PHYS 261 University Physics Lab II, Spring 2021, Summer 2021
ASTR 112 Solar System, Fall 2022, Spring 2023, Summer 2023
ASTR 114 Stars and Galaxies, Fall 2022, Spring 2023, Summer 2023

GEORGE MASON UNIVERSITY July 2009 – August 2016
Adjunct Professor, Department of Physics and Astronomy, Fairfax, VA

Online laboratory courses developed:
ASTR 112 Introductory Astronomy Lab: The Solar System
ASTR 114 Introductory Astronomy Lab: Stars and Galaxies

Lecture courses taught:
PHYS 245 College Physics II, Summer 2009, 2010, 2016
PHYS 104 Physics Everyday Phenomena II, Spring 2010
ASTR 111 Introduction to Solar System, Fall 2010, 2011, 2012
PHYS 260 University Physics II, Fall 2012, Summer 2010, 2011, 2012
PHYS 262 University Physics III, Summer 2014, 2015
MATH 105 Pre-calculus, Fall 2009, 2010

Laboratory courses taught:
ASTR 112 Solar System, Fall 2009, 2011, 2013, 2014, Summer 2010, 2016
ASTR 114 Stars/Galaxies, Spring 2010**,** 2011, 2012, 2013, 2016, Summer 2014, 2015, 2016
PHYS 244 College Physics Lab I, Fall 2009, 2013, Summer 2013
PHYS 246 College Physics Lab II, Fall 2012, Spring 2012, 2013, 2014, Summer 2013
PHYS 161 University Physics Lab I, Fall 2013, Spring 2014, 2015
PHYS 261 University Physics Lab II, Fall 2013, 2014, Spring 2013, 2015, 2016, Summer 2012, 2013
PHYS 263 University Physics Lab III, Fall 2015, Summer 2015, 2016
SYST 221 Systems Modeling Laboratory, Spring 2010

Recitations taught:
Phys 260, Fall 2012, Summer 2011, 2012
Phys 262, Summer 2014, 2015

Lab Coordinator:
PHYS 244 College Physics Lab I, Summer 2013

A+ ACADEMY November 2007 – June 2009
Tutor, McLean, VA
Tutored elementary, middle, and high school students in Mathematics and Physics.

PIKES PEAK COMMUNITY COLLEGE January 2001 – June 2003
Lab Coordinator, Instructor, Integrated Circuit Fabrication Institute and Electronics Department, Colorado Springs, CO

Lecture courses developed:
ELE 112 Passive Circuits
ICF 106 Semiconductor Active Devices and Mixed Signal ICs
ICF 108 Control Systems
ICF 214 RF Energy

Laboratory courses developed:
ELE 113 Passive Circuit Lab
ICF 107 Semiconductor Active Devices and Mixed Signal ICs Lab

Lecture courses taught:
ELE 114 Semiconductor Active Devices
ELE 118 Digital Circuits
ICF 106 Semiconductor Active Devices and Mixed Signal ICs
ICF 108 Control Systems
ICF 214 RF Energy
MAT 108 Technical Mathematics

Laboratory courses taught:
ELE 115 Semiconductor Active Devices Lab
ELE 119 Digital Circuits Lab
ICF 107 Semiconductor Active Devices and Mixed Signal ICs Lab

UNITED STATES AIR FORCE ACADEMY January 1998 – January 2001
Visiting Scholar, Department of Astronautics, Colorado Springs, CO

Lecture courses taught:
ASTRO 320 Introduction to Astronautics for Engineers and Scientists
ASTRO 331 Space Vehicle Systems Design (Selected Lectures)

Laboratory courses taught:
ASTRO 433/ENGR 433 Aerospace Vehicle Systems Design

Other courses:
ASTRO 491 Special Projects

UNIVERSITY OF ULM April 1990 – August 1997
Assistant Professor, Technical Director of Microelectronics Research Center, Department of Electron Devices and Circuits, Ulm, Germany

Lecture and recitation courses developed and taught:
Einführung in die Satellitentechnik /Introduction to Satellite Communication (Lecture and Recitation)
Halbleiterbauelemente Übungen /Semiconductor Devices (Recitation)
Technische Elektronik/Technical Electronics (Recitation)
Sensoren/Sensors (Recitation)

Laboratory courses developed and taught:
Praktikum Halbleitertechnologie / Laboratory in Semiconductor Device Technology

HONORS AND AWARDS

Faculty Member of the Year Award (GMU Alumni Association)	2024
Nomination for GMU 2024 Teaching Excellence Award	2023
Nomination for GMU 2023 Teaching Excellence Award	2022
Mason Core Award	2021
Mason Core Award	2020
Nomination for GMU Online Teaching Excellence Award	2020
Nomination for GMU Inaugural Online Teaching Excellence Award	2018
Air Force Association's Citation of Honor, Falcon Gold Project, Team Achievement Award	1998
AIAA Special Recognition Award, Falcon Gold Project, Team Achievement Award	1998
Master of Space Studies Program Scholarship Award	1996
Space Studies Summer Session Program Fellowship	1995
Nomination for the State Teaching Award of Baden–Württemberg	1994
Max Planck Society Research and Dissertation Completion Scholarship	1981 – 1985

GRANTS

George Mason University, Office of the Provost, 4VA Grant for course redesign and the development of open educational resources for ASTR 112, ASTR 114, ASTR 115; Awarded in 2018

George Mason University, Office of the Provost, 4VA Grant to develop open educational resources for ASTR 111; Awarded in 2016

George Mason University, Department of Distance Education, Upgrade of an online Astronomy Science Lab: ASTR 114; Awarded in 2016

George Mason University, Department of Distance Education, Development of an online Astronomy Science Lab: ASTR 114; Awarded in 2013

George Mason University, Department of Distance Education, Development of an online Astronomy Science Lab: ASTR 112; Awarded in 2012

Daimler Benz Forschungszentrum, (EADS GMbH), Ulm, Germany, Research Study on "Mobile Satellite Communications and Satellite Navigation Systems – A Comparison"; Awarded 1996

University of Ulm, Travel Grant for Participation in the Master of Space Studies Program at the International Space University in Strasbourg, France; Awarded 1996

OUTREACH

Early Identification Program, Instructor	2025
Nanotechnology Day, Representative of the Physics Department	2024
Westminster Retirement Community, invited talk about eclipses	2024
George Mason Eclipse Watch Party, Lead Organizer	2024
Mentored a team of middle school students (Team Lavenger)	2023
George Mason Space Day, Co-Founder, Committee Chair	2022 -present
Apollo 11 to New Horizons – Celebrating 50 Years of Mission Success, Initiator	2019

SERVICE

Deputy Mission Systems Engineer, NASA Landolt Space Mission	2025
Member of Term Faculty Search Committee	2025
Master of Ceremony, Space Day	2024
Member of the NANO IMAGINE ADVISORY COUNCIL	2023 - 2024
Chair Space Day Organizing Committee	2024 – present
Member of Space Day Organizing Committee	2023
Cofounder and organizer of Space Day	2022
Search Committee for the position of Physics Department Head	2023
Served as ITL proposal reviewer for the 2023 ITL conference	2023
Physics Department Bylaws Committee	2023 - present
Member of the Committee for Diversity, Equity, and Inclusion	2022
Co-Chair of the Astronomy Core Revitalization Committee	2022 - present
Mason Effective Teaching Committee, Member.	2019 - 2022
Served on the GMU selection committee for the 2018-2019 Fenwick Fellow.	2018
Served as judge for the Loudon County High School research paper presentation.	2018
Member of the GMU Physics Department committee for undergraduate laboratories.	2016-present

RESEARCH

Assessed GPS signal in geosynchronous transfer orbit (United States Air Force Academy, Department of Astronautics, January 1997 to December 1998)

Investigated low-frequency noise of short gate length GaAs MESFETs and HEMTs (University of Glasgow, Scotland, July 1994 to September 1994)

Researched electrical properties of low noise HEMTs (Siemens A.G., Department of Discrete Semiconductor Devices, January 1986 to April 1990)

Performed magneto-optical studies of GaAs-$Ga_{1-x}Al_xAs$ quantum wells and superlattices in high magnetic fields (Max Planck Institute, High Magnetic Field Laboratory, Grenoble, France, January 1983 to December 1985)

Conducted magneto-spectroscopy experiments on $Cd_{1-x}Mn_xTe$ (Max Planck Institute, High Magnetic Field Laboratory, Grenoble, France, December 1981 to December 1982)

Investigated intra-band transitions in $Pb_{1-x}Pb_xTe$ (Mining University, Department of Physics, Leoben, Austria, March 1980 to July 1981)

CERTIFICATIONS AND LICENSES

Satellite Tool Kit (STK) Certification, STK Professional Edition, Analytical Graphics, Inc., 2007

Instructor, Technical Education; Credential for Career and Technical Education, Colorado State Board for Community Colleges and Occupational Education, 2001 – 2004

PROFESSIONAL EXPERIENCE

GEORGE MASON UNIVERSITY August 2023 – present

Instructional Associate Professor, Department of Physics and Astronomy, Fairfax, VA,

- Teaches College Physics lecture courses in the EMPD2 program and during every summer term.
- Introduced ALEKS to the EMDP2 program so that students can learn the math skills necessary for Phys 243 and Phys 245.
- Teaches College Physics and Astronomy laboratory courses and online Astronomy lecture courses.
- Coordinates and supervises all sections of College Physics labs.
- Coordinates and supervises all sections of the Astronomy labs.
- Provides weekly training for new GTAs who teach Phys 244 and Phys 246 and Astronomy labs.
- Regularly revises lab material for Phys 244 and Phys 246 and implements changes as appropriate.
- Designs new course material. Was selected by the Distance Education Department to redesign ASTR 112 during the Fall 2025 term.
- Developed and taught a new course, Phys 310, Semiconductor Materials and Processing Technology. Students learn how to make a microchip. The course includes three to four visits to the GMU nanofabrication facility.
- Serves as the Chair of the Space Day planning committee and coordinates all planning efforts.
- Served as Master of Ceremony at Space Day 2024.
- Serves as a member of the Term Faculty search committee.
- Supports the NASA Landolt Mission as Deputy Mission System Engineer. Creates systems engineering plans, such as the Risk Management and Mission Assurance Plan and the Communications Licensing Plan, and participates in preparing all documents for gate reviews.
- Participated as an instructor in the Early Identification Program.
- Serves as the Co-Chair of the Astronomy Core Revitalization Committee
- Serves on the undergraduate lab committee.
- Serves on the Department's Bylaws committee.
- Served as a member of the NANO IMAGINE Advisory Council.
- Was nominated for the 2023 Teaching Excellence Award in 2022
- Was nominated for the 2024 Teaching Excellence award in 2023
- Was nominated by the students of the EMDP2 Program for the 2024 Faculty Member of the Year Award from the GMU Alumni Association. Received the award in October 2024.
- Organized the Eclipse Viewing event in April 24. More than 1000 people attended the event.
- Taught in the Early Identification Program (EIP) program in the spring semester 2025.
- Represented the department at the Nanotechnology Day.

GEORGE MASON UNIVERSITY August 2016 –July 2023

Instructional Assistant Professor, Department of Physics and Astronomy, Fairfax, VA

- Taught College Physics lecture courses, Phys 243 and Phys 245, in the EMPD2 program and also during every summer term.

- Taught College Physics and Astronomy laboratory courses, in person and online, and online Astronomy lecture courses.
- Coordinated and supervised all sections of College Physics labs.
- Coordinated and supervised all sections of the Astronomy labs.
- Provided weekly training for new GTAs who teach Phys 244 and Phys 246 and Astronomy labs.
- Regularly revised lab material for Phys 244 and Phys 246 and implemented changes as appropriate.
- Designed new course material.
- Created the online version of Phys 244 and Phys 246.
- Evaluated new equipment for use in Physics labs.
- Mentored a graduate student in an independent study project (Phys 796).
- Designed and taught Phys 311, the Department's new Instrumentation lab course. In it, students learn basic electronics and different software tools, such as Multisim and LabVIEW, to design and analyze electronic circuits and virtual instruments.
- Revised and designed online Astronomy labs (ASTR 112 and ASTR 114).
- Received a 4VA grant for course redesign and development of open educational resources for ASTR 112, ASTR 114, and ASTR 115. The new material is used in various Astronomy courses.
- Created the online version of ASTR 111.
- Serves as co-chair of the Astronomy Core Revitalization Committee.
- Served the departmental Committee for Diversity, Equity, and Inclusion.
- Serves on the undergraduate lab committee.
- Served on the Search Committee for the Physics and Astronomy Department Chair.
- Was nominated again for the Online Teaching Excellence Award in 2020.
- Was nominated for the 2018 Inaugural Online Teaching Excellence award in December 2017.
- Participated in the Physics Department's undergraduate program assessment.
- Reviewed the book "College Physics" from OpenStax. The review was published in the Open Textbook Library https://open.umn.edu/opentextbooks/reviews/1340
- Assesses students' attitudes toward OpenStax's College Physics book using a survey. The project aims to combine and analyze data from student surveys from college physics summer courses over three consecutive years. The library has indicated interest in these data.
- Served as judge in the 2018 Loudon County High School research paper presentation.
- Served on the selection committee for the 2018-2019 Fenwick Fellow.
- Was elected to serve on the Effective Teaching Committee.
- Lead coordinator for GMU SPACE DAY. Initiated and co-organized the event.
- Initiated and organized the "Apollo 11 to New Horizons – Celebrating 50 Years of Mission Success" event. This event was a part of Science Connect in 2019.

GEORGE MASON UNIVERSITY July 2009 – August 2016

Adjunct Professor, Department of Physics and Astronomy, Fairfax, VA

- Taught lecture and lab courses in Physics, Astronomy, and Mathematics.
- Created the first online Astronomy lab.
- Developed course material for both face-to-face and online Astronomy labs.

PG PUBLIC SERVICES May 2010 – May 2011

Senior Manager, Falls Church, VA

- Created an enterprise requirements management framework for ICE OCIO's Program Executive Office (PEO) (Department of Homeland Security).
- Performed an analysis of ICE OCIO to determine the current state of the enterprise.

A+ ACADEMY November 2007 – June 2009

Tutor, McLean, VA

- Tutored elementary, middle, and high school students in Mathematics and Physics.

BELLE CONSULTING SERVICES July 2004 – June 2009

Consultant, Falls Church, VA

- Provided management and technical contract assistance services to various clients.
- Naval Surface Warfare Center (NAVSEA): Developed requirements specification for an Integrated Health and Usage Monitoring System (IHUMS).
- National Institutes of Health (NIH): Provided analytical support in various studies.

MAYFAIR AND ASSOCIATES March 2004 – July 2004

Consultant, Washington, DC

- Analyzed business and marketing intelligence for World Wide Retail Exchange.
- Updated customers' marketing and client databases.
- Assisted the customer with IT issues related to network security. Monitored and analyzed data exchange between WWRE and its clients worldwide.

PIKES PEAK COMMUNITY COLLEGE January 2001 – July 2003

Coordinator, Instructor, ICFab, Colorado Springs, CO

- Coordinated laboratory courses and headed the ICFab laboratory.
- Managed and reorganized lab facilities.
- Developed and taught lecture and lab courses in electronics.

UNITED STATES AIR FORCE ACADEMY February 1998 – January 2001

Visiting Scholar, Department of Astronautics, Colorado Springs, CO

- Taught courses in Astronautics.
- Instructed cadets in designing, building, and testing small satellites.
- Identified GPS–based hardware solution for the "Falcon Gold" satellite, thus ensuring the extraordinary success of the Air Force Academy's first satellite mission.
- Established project documentation standards for the United States Air Force Academy's small satellite program. Reviewed all systems engineering documents.
- Authored the FalconSat-1 design document and the after-action report.
- Initiated a cooperative research agreement between United Technologies Microelectronics Systems (UTMC), an Aeroflex company, and the United States Air Force Academy.
- Negotiated with UTMC for funding for the small satellite systems engineer position.
- Created a win-win situation which allowed UTMC to space-qualify its new computer hardware.

NAVSYS CORPORATION September 1997 – January 1998

Project Engineer, Monument, CO

- Initiated and managed the Falcon Gold project, which allowed the company to space-qualify its GPS sensor.
- Defined, verified, and validated requirements for GPS systems.
- Chaired quality assurance team.
- Documented system interdependencies between the GPS sensor and other spacecraft subsystems in the Falcon Gold Interface Control Document.
- Resolved coding and timing problems in the Colorado Mayday system, allowing the project to enter phase II on schedule.

EADS GMBH (DAIMLER BENZ FORSCHUNGSZENTRUM) July 1996 – July 1997

Consultant, Ulm, Germany

- Compared and assessed mobile satellite communication and navigation systems.

UNIVERSITY OF ULM April 1990 – August 1997

Assistant Professor, Technical Director of Microelectronics Research Center

Department of Electron Devices and Circuits, Faculty of Engineering Sciences, Ulm, Germany

- Developed and taught courses for the Department of Electron Devices and Circuits.
- Developed and headed a laboratory course in Semiconductor Technology. The course was selected for the State Teaching Award by the student body of the School of Engineering Sciences of the University of Ulm.
- Created the course “Introduction to Satellite Communication”. This was the first and only space technology course in the curriculum of engineering sciences. Achieved the highest student participation in a non-mandatory course.
- Successfully expedited the completion of the largest microelectronics technology center at a German university through coordinating user demands with various departments and the planning team, leading to the 30-million-dollar project on schedule and within budget.
- Represented the users of the research center in the planning team. Implementing the user demands of three different departments posed a challenge to the project team. The interests of the users often conflicted with the vision of the project leaders and the availability of the necessary financial means for implementing the desired technical solutions.
- Successfully mediated between the project team and the user community.
- Negotiated with the representative of the state government to provide the additional funding necessary to complete all systems in accordance with user requirements and environmental laws.
- Decision maker regarding the purchase and installation of equipment. The budget for the research equipment was about $10 million, distributed over five years. It required careful planning to provide the users with the equipment necessary to conduct their research effectively. I met regularly with the department heads to discuss their priorities.
- Evaluated technological needs to ensure everyone’s interests were met. As a result, the three departments that were the main users of the center were able to conduct their research before the center was fully operational.
- Responsible for hiring support personnel. The operation of the center and the employees' exposure to hazardous materials required training in specific skills. After providing the necessary tools and

training, all team members were involved in the development of the operations plan and safety procedures.

- Created and implemented a requirements framework for the research center.
- Developed concepts for operations, risk management plans, and configuration management concepts.
- Developed interface control document. Planned and documented equipment installation for a 1000 m^2 class 1 to 100 clean room.
- Solved technical and managerial problems while establishing business relationships with various companies and the state government.

SIEMENS AG January 1986 – March 1990

Product Development Engineer, Munich, Germany

- Managed production of Metal Semiconductor Field Effect Transistors.
- Invented new process technology for the fabrication of high-speed semiconductor devices, which improved the electrical performance of the devices and increased the yield by 50%.
- Researched fabrication techniques for High Electron Mobility Transistors (HEMTs).

MAX PLANCK INSTITUTE FOR SOLID STATE PHYSICS December 1981 – December 1985

Research Assistant, CNRS, Grenoble, France

- Studied semiconductor materials in high magnetic fields.
- Determined for the first time the exciton binding energy in GaAs-$Ga_{1-x}Al_x$ As quantum well structures.
- Proved that superlattice structures behave like bulk crystals.

Project: Magneto-optical Studies of Quantum Wells and Superlattices
Principal Investigator: Professor Dr. Jan Kees Maan

MINING UNIVERSITY March 1980 – November 1981

Research Assistant, Institute of Physics, Leoben, Austria

- Assisted with equipment installations and calibrations in the newly built lab.
- Tested and calibrated the far infrared laser.
- Designed and built a Michelson interferometer.
- Investigated semiconductor materials with laser spectroscopy.

Project: Intra-band Transitions in Pb_{1-x} Ge_x Te
Principal Investigator: Professor Dr. Günther Bauer

VOLUNTEER EXPERIENCE

INFRAGARD November 2009 – June 2010

Vice President for Community Outreach, Washington, DC

Responsible for building relationships between the FBI and leaders in government and industry with the goal of developing a framework for protecting the critical infrastructure of the United States.

INCOSE, WMA CHAPTER January 2007 – January 2010

Programs Chair and Board Director, Washington, DC

Managed and developed a professional development program.

Organized business meetings and short courses for the 800+ members of the Washington Metropolitan Area Chapter of the International Council on Systems Engineering.

INTERNATIONAL SPACE UNIVERSITY September 1996 – July 1997
Student Representative for Academic Affairs, Strasbourg, France
Helped and advised students concerning their academic issues.

UNIVERSITY OF ULM January 1992 – January 1994
Women's Representative, Faculty of Engineering Sciences, Ulm, Germany
Addressed and resolved equal opportunity issues for women in engineering sciences.

PATENTS

G. Belle, E. Knapek, F. Ponse, "Semiconductor Wafer with Doped Kerf-regions", Patent number: 89121925.5, Siemens AG., 1989 – 1995.

F. Ponse, A. Platzer, **G. Belle**, E. Knapek, "Field Effect Transistor with a T-Gate", Patent number: 89121924.8, Siemens AG., 1989 – 1995.

INVITED TALKS AND PRESENTATIONS

"Systems Engineering for Nanosystems", International Council on Systems Engineering, Washington Metropolitan Area Chapter, Washington DC, 2009
"Systems Thinking", Institute of Physics, University of Graz, Austria, 2008
"Falconsat-1 – The Air Force Academy's First Free Flying Satellite", Small Satellite Design and Technology Workshop, Applied Technology Institute, Colorado Springs, Colorado, 2000
"Falcon Gold – The Air Force Academy's GPS Flight Experiment", Core Technologies for Space Conference of the United States Space Foundation, Colorado Springs, 1998

PRESS AND MEDIA

"Shoot for the Stars at George Mason University's Space Day", Kristin Johnson, Fairfax County Times
"Air force cadets will fly their own birds", Loring Wirbel, EE Times, December 31, 1998

OTHER ACTIVITIES

Conference Session Chair, "Future Mission Concepts", 14th Annual Small Satellite Conference, Utah State University, Logan, Utah, 2000

Co-editor, "Jerry Sellers: Understanding Space", Space Technology Series, United States Air Force Academy, Colorado Springs, Colorado, 2000

Co-author, Team Design Project Report, "M.I.S.S.I.O.N – Multi-mission Innovative Space Systems for an Information Optimized Network", International Space University, Strasbourg, France, 1997

Co-author, Team Design Project Report, "Earth's Polar Regions", International Space University, Strasbourg, France, 1995

SOFTWARE SKILLS

Canvas, Blackboard, MS Office, Capstone, DataStudio, LabView, Matlab, Multisim, C++, Camtesia, Satellite Tool Kit (STK), Visio, MS Project

PROFESSIONAL AFFILIATIONS

AIAA, American Institute of Astronautics and Aeronautics, Member
WIA, Women in Aerospace, Member
INCOSE, International Council on systems Engineering
