GEOLOGY 306 - SOIL SCIENCE
SPRING 2024

PREREQUISITE
GEO 101 and CHEM 103, or CHEM 211, or similar

CLASS MEETS
Tuesday 4:30 p.m. to 7:10 p.m.
Exploratory Hall, 1005
IN ADDITION: Mini lectures online.

INSTRUCTOR
Dr. Julia Nord, 3453 Exploratory Hall
Email Address - jnord@gmu.edu

OFFICE HOURS
Tuesday 4:00 p.m - 4:30 p.m. and 7:15 p.m. to 8:00 p.m. and by appointment

TEXT
Selected Readings will be assigned.

FOR FIELD WORK Field Book for Describing and Sampling Soils, Version 3.0 U.S. GOVERNMENT BOOKSTORE.

EXAMS
All exams must be taken as assigned
Make-up exams will only be allowed in exceptional and documented circumstances.

MULTITASKING
Recent research shows that humans are not good at multitasking, in fact several peer reviewed journals state that multitasking results in poorer learning and poorer performance. Please refrain from using phones and computers for text messages, Facebook, internet searching, shopping, IM and other related activities. If we do not know the answer to a question as a group we can look it up during the break and have a discussion.

If you use a computer for note taking please do not use it for other purposes.

IF you still want to multitask please sit on the back row, or where no-one else can see your screen.

Does multitasking in the classroom affect learning outcomes? A naturalistic study, Computers in Human Behavior (2020)

In-class multitasking and academic performance Computers in Human Behavior (2012)

Multitasking in the University Classroom International Journal for the Scholarship of Teaching and Learning (July 2012)

Students are Better Off without a Laptop in the Classroom Scientific American. July 2017

Computer Multitasking in the Classroom: Reduced Learning versus Modern Living ACM Interactions. 2020

ACADEMIC INTEGRITY
Mason is an Honor Code University; please see the Office for Academic Integrity for a full description of the code and the honor committee process. HONOR CODE.

Some key parts paraphrased from Mason's Honor code and the Center for Teaching and Faculty Excellence

The integrity of the University community is affected by the individual choices made by each of us. Mason's Honor Code has clear guidelines regarding academic integrity. There are three fundamental principles to follow at all times: (1) all work submitted must be your own; (2) when using the work or ideas of others, including fellow students, give full credit through accurate citations; and (3) if you are uncertain about the ground rules on a particular assignment, ask for clarification.

Plagiarism means using the exact words, opinions, or factual information from another person without giving the person credit. Writers give credit through accepted documentation styles, such as parenthetical citation, footnotes, or endnotes. Paraphrased material must also be cited, using MLA, APA or discipline based format.

A number of projects in this class are designed to be completed within your study group. With collaborative work, names of all the participants should appear on the work. Collaborative projects may be divided up so that individual group members complete portions of the whole, provided that group members take sufficient steps to ensure that the pieces conceptually fit together in the end product.

Some projects are designed to be undertaken independently. You are responsible for making certain that there is no question that the work you hand in is your own. If only your name appears on an assignment, your professor has the right to expect that you have done the work yourself, fully and independently.

http://ctfe.gmu.edu/teaching/designing-your-syllabus/
**DISABILITY ACCOMMODATIONS**

If you have a documented learning disability or other condition that may affect academic performance you should:
1) make sure this documentation is on file with Office of Disability Services (SUB I, Rm. 4205; 993-2474; http://ods.gmu.edu) to determine the accommodations you need; and
2) talk with me to discuss your accommodation needs.

**BASIC NEEDS ACCOMMODATIONS**

It can be challenging to do your best in class if you have trouble meeting basic needs like safe shelter, sleep, and nutrition. If you have difficulty affording groceries, accessing sufficient food to eat daily, or lack a safe and stable place to live, I urge you to contact Student Support and Advocacy Center at 703.993.3686 and https://ulife.gmu.edu/get-help/pop-up-pantry/

**RECORDING OF LECTURES**

PLEASE NOTE: The opinions I express in this class are not necessarily the ones I personally hold. I may make statements to elicit a response.

If you are recording the class, the opinions of other class members must not be played back to anyone outside of the classroom.

**OSCAR Students as Scholars Inquiry-level course**

"This class is identified as a Scholarship Level, Mason Impact (MI) Course. Students engage in "Synthesis of information from a variety of sources to form a new explanation or exploration of a concept or event" This course is designed to introduce you to academic-level scholarly inquiry, and give you some of the skills to ask good research questions and find the resources to answer those questions. In this class our resources will be field work and peer reviewed literature.

Scholarly Inquiry courses must address both of the following elements:
1. Articulate and refine a scholarly question.
2. Follow ethical principles.

And, address at least one of the following elements:
3a. Choose an appropriate discovery process for scholarly inquiry.
3b. Gather evidence appropriate to the question.
3c. Apply appropriate scholarly conventions during scholarly inquiry.
3d. Apply appropriate scholarly conventions when reporting or performing.

And, address at least one of the following elements:
4a. Assess the validity of key assumptions and evidence.
4b. Situate the scholarly inquiry within a broader context.

**Course Goals:**

Provide an introduction to the physical, chemical, and biotic properties of soils.

Discuss issues relating to soil quality, soil stewardship, and the problems of providing food for our growing population. Soils are becoming a scarce resource.

Understand how soils form and support life. Without soil, the earth’s surface would be barren rock or sand, silt, clay and gravel. Soil is a biologically active zone where sunlight, water, the atmosphere, and living things mix and interact with the Earth’s rocks and minerals.

Understand the complexity of soils. Soil is constantly altering its composition in response to changing conditions. It supports a host of interdependent communities of living things which survive by endlessly exchanging energy and chemical resources (minerals, elements, nutrients etc).

Work with the USDA soil classification scheme, including soil mapping, and how soil is used as a resource for agriculture, building sites, landfills, septic systems, and water (quality, availability and movement). Be able to read and understand USDA profile descriptions. A knowledge of soils is necessary for site assessment, urban and regional planning, and pollution mitigation.

Describe a soil profile in the field using the correct protocols.

Appreciate that poor soil stewardship resulted in the demise of many civilizations - and it is still uncertain how well soils will be able to support a growing, hungry population, now over 8 billion. The generation of dust from soil erosion is linked to increased cases of human disease, coral death, red tides, drought, and the end of the Ice Age. Dust is even implicated in the demise of the dinosaurs. Soil interactions are also very important in the investigation of long-term Global Climate change.

**Your Goals**

Take some time over the next week to write your goals here.

**My peers**

Write down contact information for 2 of your fellow students here.
## COURSE SCHEDULE

<table>
<thead>
<tr>
<th>DATE &amp; Assignments</th>
<th>TOPICS</th>
<th>READINGS</th>
</tr>
</thead>
</table>
| **Jan. 16**  
Tuesday  
Week 1 | **Assignment #1 Rocks and their Minerals**  
Use your physical geology / Intro text, or your notes.  
View the online lectures - geology review  
Complete forms. Due. Jan. 23rd, on the BB site, or a hard-copy in class | What is soil?  
Four constituents of soil - water, air, minerals (all non-organic) and life (organic)  
Soils and their uses.  
Sylabus Discussion.  
Pamunkey Soil  
4 soil forming processes  
Soil Taxonomy #1 | SSS (text) Chapter 1  
Soil Processes. [https://processes.soilweb.ca/soil-processes/](https://processes.soilweb.ca/soil-processes/)  
To understand the range of disciplines intertwined with soil science look at these 2 sites [http://en.wikipedia.org/wiki/Soil_science](http://en.wikipedia.org/wiki/Soil_science)  
REMEMBER - Wiki is NOT peer reviewed. However this is a pretty good summary and I have checked it.  
What makes Good Garden Soil by John Mertus. This is a very good summary. The PDF is on the BB site - week 1. This material will be complex now. You will be able to read more and more of this summary as you learn over this semester. |
| **Jan 23.**  
Tuesday  
Week 2 | **Assignment #2 Weathering**  
Due. Jan. 30, on the BB site, or a hard-copy in class | Introduction to the 5 soil forming factors.  
CLORPT  
CLimate  
Organics  
Relief (topography)  
Parental Material  
T ime  
Weathering | SSS (text) p. 61-63 and 5-13,  
[Click link to "Soil Formation and Classification"](https://www.youtube.com/watch?v=mg7XSjcnZQM) |
| **Jan 30**  
Tuesday  
Week 3 | **Assignment #3 Texture, Color etc.**  
Due. Feb 6, on the BB site, or a hard-copy in class | Soil formation.  
Introduction to the physical properties of soils. | SSS (text) 63-69, Chapter 6.  
[https://www.youtube.com/watch?v=mg7XSjcnZQM](https://www.youtube.com/watch?v=mg7XSjcnZQM)  
[https://www.soils.org/about-soils/basics/](https://www.soils.org/about-soils/basics/)  
[https://stormwater.pca.state.mn.us/index.php?title=Soil_physical_properties_and_processes](https://stormwater.pca.state.mn.us/index.php?title=Soil_physical_properties_and_processes) |
| **Feb 6**  
Tuesday  
Week 4 | **Assignment #4 Cation Exchange Capacity**  
Due. Feb 13, on the BB site, or a hard-copy in class | Cation Exchange Capacity (CEC)  
Products of Weathering.  
Clay minerals.  
[Soil Elevation](http://www.soilquality.org.au/factsheets/cation-exchange-capacity) |
| **Feb 13**  
Tuesday  
Week 5 | **No Assignment**  
| | Soils and Climate  
Soils aeration  
Soil temperature  
Soil drainage  
Soil Taxonomy #2 More detail of the 12 soil orders. | SSS (text) Chapter 4.  
Soils and Climate  
Climate - Soils  
USDA soil taxonomy  
[12 Soil Orders](http://www.soilquality.org.au/factsheets/cation-exchange-capacity) |
