

**From the Cradle to the Cubicle:
Using Science to Protect Water Resources**

Jacques (Jack) Oliver is a senior regulatory scientist with the U.S. EPA, Office of Water, in Washington, D.C. Since joining the Office of Science and Technology in 2007, his work has focused on implementing the Federal Water Pollution Control Act, specifically water quality standards development and regulatory oversight activities. Jack administers a national nutrient pollution control program that provides technical and regulatory support to state and tribal surface water agencies. Jack is a graduate of the Georgia Institute of Technology and earned M.S. and Ph.D. degrees from the College of William and Mary, Virginia Institute of Marine Science. In 2004, Jack served as a John A. Knauss Marine Policy Fellow with the U.S. House of Representatives, Committee on Resources. In 2005, he joined the National Sea Grant College Program where he served as the program manager for the Knauss Fellowship, and oyster disease and finfish aquaculture extramural research programs.

Jacques Oliver

Environmental Science and Policy Seminar Series

Thursday, November 14

3 to 4 p.m.

in Exploratory 3301

COMPLIMENTARY PIZZA AND DRINKS WILL BE SERVED
