Lab Manager/Research Assistant Advertisement

Our lab is looking for a part-time lab manager and research assistant (~25 hours/week) to start immediately for at least 6 months but up to a year or more, funding permitted. The individual would oversee the daily management of the Evolutionary Toxicology Lab at Potomac Science Center including organizing and ordering supplies and training students. They would also be expected to lead or participate in multiple projects related to experimental and computational environmental toxicology, including conducting research and co-authoring manuscripts. Pay is competitive. More about our lab can be found at www.scottglaberman.com

The following qualifications and skills are desired:

- Minimum of a BA/BS in a related scientific field
- Can be a graduate student but must be able to devote 20-25 hours a week to the position
- Must have a car to be able to drive to and from Potomac Science Center in Woodbridge, VA
- Basic lab skills including use of pipettes, autoclave, making solutions, etc.
- Proficiency in statistics, data manipulation, and R programming and graphics
- Demonstrated ability to write clearly and meet deadlines

Please send a resume/CV and a 1-2 paragraph statement of interest to sglaberm@gmu.edu
