### **Introduction to Neuroscience**

NEUR 101-DL3, Spring 2024

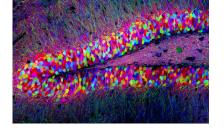

Instructor: Dr. Gwendolyn (Wendy) Lewis Instructor e-mail: glewis13@gmu.edu

Course Format: Online, asynchronous in Blackboard

Credits: 3

**Instructor Office: Krasnow 254** 

Office Hours: Drop-in office hours are held during the times below. If you are unable to attend a drop-in time, please email me to schedule an appointment.

- Monday & Tuesday 2:30pm 3:30pm (virtual or in-person). Log in virtually https://gmu.zoom.us/j/4952912681 or come in person to Krasnow 254.
  - If multiple students need to meet at once, in-person visitors will get priority. I'll meet with students in the Zoom room in the order they entered. Please be patient if you are in the Zoom waiting room!
- Friday 11:00am 12:00pm (virtual only). Log in virtually <a href="https://gmu.zoom.us/j/4952912681">https://gmu.zoom.us/j/4952912681</a>
- Office hours change sometimes, check the Announcements in Blackboard for updates

#### **Course Overview**

The nervous system controls everything we think, do, and feel. But how does it do this? And what happens when things go wrong? In this course, we will answer these questions by providing an introduction to the study of the brain (neuroscience). We will cover basic concepts in neuroscience such as neurons, action potentials, and synapses and examine their involvement in everyday life. We will explore what neuroscience has already uncovered about human development, aging, and disease. This course is meant serves an introduction to neuroscience for students of all majors.

### Mason Core: Natural Science, Non-lab

This is a Natural Science, non-lab Mason Core course. This course aims to enhance your understanding of scientific inquiry by an introducing you to the tools and methods of neuroscience as well as the application of emerging neurotechnologies for personal, medical, and social purposes.

# **Course Modality**

This course is fully **online and in an "asynchronous" format**, meaning you will NOT be required to log into live virtual sessions. Video lectures will be posted to Blackboard. Exams and quizzes will be taken in Blackboard. Keep in mind that although the course does not meet live, assignments still have firm due dates (see schedule).

# **Blackboard Login Instructions**

To access the course blackboard site, log in to <a href="mymason.gmu.edu">mymason.gmu.edu</a> and select the Courses tab. Under the course list, select the current semester (Spring 2024) and click the course number for NEUR-101-DL3.

### **Blackboard Login Instructions**

Assignments will be posted and submitted to Blackboard. To access the course Blackboard site, log in to <a href="mailto:mymason.gmu.edu">mymason.gmu.edu</a> and select the Courses tab. Under the course list, select the current semester (Spring 2023) and click the course number for NEUR-101-001.

### **Office Hours and Course Help**

Getting help is easy. I am available for office hours every week during the times listed at the top of the syllabus. Please check Blackboard Announcements for any adjustments to office hours. You can also get help by posting questions to the *Ask the Instructor* discussion forum in Blackboard.

### **Technology Requirements**

This course requires the use of LockDown Browser and a webcam for online exams. The webcam can be built into your computer (internal webcam) or can be the type of webcam that plugs in with a USB cable (external webcam). See instructions for <u>Installing and Using LockDown Browser</u>, or watch <u>this short video</u> to get a basic understanding of LockDown Browser and the webcam feature.

You will need the following system requirements for online exams:

- Windows: 10, 8, 7
- Mac: OS X 10.10 or higher
- iOS: 10.0+ (iPad only). Must have a compatible LMS integration.
- Web camera (internal or external) & microphone
- A reliable internet connection
- Prior to your first exam, you must install LockDown Browser following the step-by-step instructions.

#### Software

- Web browser (see <u>Blackboard Support</u> for supported browsers). Your browser must be up to date and running the most recent version on Java.
- Respondus LockDown Browser, (free <u>Respondus download from MyMason</u>)
- Adobe Acrobat Reader to view pdf files (free Acrobat download)
- Microsoft Word and Powerpoint (<u>Microsoft 365 Apps for enterprise available free to students here</u>)

### **Natural Science Core Learning Goals**

Natural science learning goals and the course activities that support them are listed below.

- Understand how scientific inquiry is based on investigation of evidence from the natural world, and that scientific knowledge and understanding:
  - a) evolves based on new evidence
  - b) differs from personal and cultural beliefs
    - Evidence Based Science Unit
    - Neuroscience and Society Project
- Recognize the scope and limits of science.
  - o Evidence Based Science Unit
  - Neuroscience and Society Project

- Neuroethics Unit
- Recognize and articulate the relationship between the natural sciences and society and the
  application of science to societal challenges (e.g., health, conservation, sustainability, energy,
  natural disasters, etc.).
  - Neuroscience and Society Project
  - Methods and Emerging Technologies Unit
- Evaluate scientific information (e.g., distinguish primary and secondary sources, assess credibility and validity of information).
  - Evidence Based Science Unit
  - Sources Unit
  - Neuroscience and Society Project

# **Neuroscience Learning Goals**

Neuroscience content-specific learning goals are listed below.

- Describe how the human nervous system is organized from development into adulthood.
- Understand the key mechanisms of brain activity such as action potentials and brain waves.
- Describe how the brain mediates our daily activities from sleep to eating to remembering.
- Appreciate how the nervous system controls complex activities such as movement.
- Understand the basis of key human brain diseases such as Alzheimer's and Parkinson's Disease.
- Find and interpret various types of scientific literature, distinguish the quality of and relevance of sources.
- Evaluate current ethical debates in neuroscience.
- Describe how current technology is used to advance understanding in neuroscience.

#### **Textbook and Materials**

No textbook is required. Open educational resources will be provided from various sources.

# **Grading Scale:**

A+ = 97.00-100%, A = 90.00-96.99%, B+ = 87.00-89.99%, B = 80.00-86.99%, C+ = 77.00-79.99%, C = 70.00-76.99%, D = 60.00-69.99%, F = 0-59.99%

# **Grading and Assessments**

Total Grade	100%
Exams (3 x 20% each)	60%
Neuroscience and Society Project	15%
Quizzes and Activities	25%

Quizzes and Activities At the end of each weekly lesson, you will take a quiz covering that week's material. Quizzes will be open note. They are not timed and will allow 2 attempts. After the first attempt, you will be able to see which answers were incorrect. The highest grade will be recorded in

the grade center. These are meant to serve as practice for exams. Most weeks there will also be an activity to complete. These could be discussion boards, blog posts, short papers, etc.

Neuroscience and Society Project: The goal of this assignment is to apply your new knowledge of neuroscience to examine a current problem or social issue. Possible problems include:

- Drug and behavioral treatment for a mental illness in children
- Animal models of human brain disease (examples: Alzheimer's Disease, Schizophrenia)
- Human-machine interface technologies
- Treatment for nervous system disease
- Genetic testing for brain disease and/or intelligence
- Gene editing to treat brain disease

You will research your topic through primary scientific literature and prepare an informational flyer that defines and examines the problem through the lens of scientific evidence. Further details of the project will be provided.

Exams: There will be 3 regular exams, with the last exam (non-cumulative) held during finals week. These exams may consist of multiple choice, matching, fill in the blank, or short answer questions. Exams will be administered through Blackboard using the **Respondus LockDown Browser** and Monitor. Exams will be timed. Please contact the instructor if you have accommodations that allow for extra time. You are allowed one 8.5 x 11 sheet of paper notes (front and back) during the exam. You may also use additional blank scrap paper. You may not use other notes, digital resources, or the internet.

#### **Policies**

Late Work: Unless prior arrangements are made, late work will incur a deduction of 20% and will not be accepted more than two weeks after the due date. No late work will be accepted after Monday 11:59pm of Week 15. Late exams and exam extensions are not accepted except in cases of emergency or illness. It is imperative that you contact me as soon as possible regarding any issues that may affect your ability to complete assignments.

Extra Credit: You can earn up to 5 points of extra credit by sharing something to the "Cool Stuff" discussion board forum. You can earn 3 points for posting something interesting and neuroscience related to this forum, and 1 point for responding to another students post. You can earn an additional 5 points of extra credit by attending a seminar and writing a summary (details in the Weekly Lessons area of Blackboard). Extra credit will be added to the Exams grade at the end of the course. No additional or individual extra credit will be available.

Communication: If you need to contact me, please do so using e-mail from your university account only, and include the course name and section in the subject line and include your name in the e-mail. Check your e-mail and course Blackboard account daily. I will use e-mail and Blackboard to communicate with you regarding changes related to the course, syllabus, and other essential information. You are responsible for all announcements posted and sent via Blackboard and e-mail.

Conduct: Be kind and respectful to your classmates. Disrespectful behavior will lead to a potential deduction of points from the course, and an unhappy me. For a guide to online behavior, see these core rules for Netiquette.

Academic Integrity: Honesty and integrity are issues at the very core of this course and of science as a whole. George Mason has an honor code with clear guidelines for academic integrity. A few of the most important rules that pertain to this course are: 1) All work submitted must be your own should be done individually unless explicitly stated otherwise. You will be encouraged to discuss ideas, collaborate, and brainstorm with your classmates, but actual assignments need to be completed individually. 2) When referencing the work of others (this includes published and non-published work or ideas), full credit must be given through appropriate citations. 3) If you are ever unsure about the rules for an assignment, ask for clarification. Cheating and plagiarism of any form is not tolerated. Plagiarism means using the exact words, opinions, or information from another person without giving the appropriate credit. Per the Office of Academic Integrity, "subcategories of plagiarism include:

- Self-plagiarism: Intentionally or unintentionally using portions of one's old work for new assignments without appropriate attribution and/or advanced permission from the current course instructor
- Failure to adequately quote and/or cite sources or material
- False citation: This includes but is not limited to referencing work that does not appear in the indicated source."

Sharing of instructor-created materials, particularly materials relevant to assignments or exams, to public online "study" sites is considered a violation of Mason's Honor Code. For more information, see the Office of Academic Integrity's <u>summary of information about online study sites</u>.

Any offense will be referred to the academic integrity office and be dealt with in accordance with university regulations. Get more information about the Office of Academic Integrity here: <a href="https://oai.gmu.edu/">https://oai.gmu.edu/mason-honor-code/what-is-plagiarism/</a> and tips for avoiding it here <a href="https://writingcenter.gmu.edu/writing-resources/citing-sources/plagiarism">https://writingcenter.gmu.edu/writing-resources/citing-sources/plagiarism</a>.

Use of Generative-AI tools should be used following the fundamental principles of the Honor Code. This includes being honest about the use of these tools for submitted work and including citations when using the work of others, whether individual people or Generative-AI tools.

Al Text Generators: When explicitly stated by the instructor, Generative Al tools are allowed on the named assignment. Use of these tools on any assignment not specified will be considered a violation of the academic integrity policy. All academic integrity violations will be reported to the office of Academic Integrity. Use of Generative Al tools will sometimes be in alignment with the learning outcomes for this course; when meeting the outcome requires original human action, creativity or knowledge, Al tool use would not align with the stated course goals. Work produced with the aid of Generative Al is not without risk. You will be responsible for any incorrect, biased, or unethical information that is submitted and you must be transparent with your use, even on assignments where you are required to use Generative Al. A statement-of-usage is always required when using generative Al. Citations for source material are always required whether using generative Al or not.

# **Disability Accommodations**

If you have a documented learning disability or other condition that may affect academic performance you should: 1) make sure this documentation is on file with Office of Disability Services (SUB I, Rm. 4205; 993-2474; http://ods.gmu.edu) to determine the accommodations you need; and 2) talk with me to discuss your accommodation needs.

### **Mason Diversity Statement**

George Mason University promotes a living and learning environment for outstanding growth and productivity among its students, faculty and staff. Through its curriculum, programs, policies, procedures, services and resources, Mason strives to maintain a quality environment for work, study and personal growth. An emphasis upon diversity and inclusion throughout the campus community is essential to achieve these goals. Diversity is broadly defined to include such characteristics as, but not limited to, race, ethnicity, gender, religion, age, disability, and sexual orientation. Diversity also entails different viewpoints, philosophies, and perspectives. Attention to these aspects of diversity will help promote a culture of inclusion and belonging, and an environment where diverse opinions, backgrounds and practices have the opportunity to be voiced, heard and respected.\*

\* This is an abbreviated statement; full statement is available at http://ctfe.gmu.edu/professional-development/mason-diversity-statement/

### **Privacy and E-mail Use**

Students must use their MasonLive email account to receive important University information, including communications related to this class. I will not respond to messages sent from or send messages to a non-Mason email address. Student privacy is protected under FERPA (<a href="https://registrar.gmu.edu/ferpa/">https://registrar.gmu.edu/ferpa/</a>).

#### **Student Services**

- Learning Services (<u>learningservices.gmu.edu/keeplearning/</u>)
- University Libraries (library.gmu.edu)
- Writing Center (<u>writingcenter.gmu.edu</u>)
- Counseling and Psychological Services (caps.gmu.edu)
- See a longer list of Mason student support services posted on The Stearns Center website.

# **Add/Drop Deadlines**

Deadlines for this semester can be found on the Mason Academic Calendar page.

All policies may be modified at the discretion of the instructor.

# Course Calendar

NEUR 101-DL3 Spring 2024

All due times are in Eastern Standard Time (EST)

Week	Lessons	Assignments	Due Dates
<b>Week 1</b> Jan 16-22	Introduction & Cells	<ul> <li>Read Welcome page</li> <li>Review Syllabus and Course Calendar</li> <li>Watch Course Introduction Videos</li> <li>Watch What is Neuroscience? Lecture Videos</li> <li>Watch/Read Cells of the Nervous System Material</li> <li>Week 1 Activity- Post to the "Welcome" Discussion Board (1 post and 2 comments)</li> <li>Take the Week 1 Quiz</li> <li>Optional: Post to the "Ask the Instructor" Discussion Board forum and meet me in office hours</li> </ul>	Due Monday 1/22 11:59pm  • Week 1 Activity- "Welcome" Discussion board post and 2 comments • Week 1 Quiz
<b>Week 2</b> Jan 23-29	Development	<ul> <li>Watch /Read Building a Brain: Development Material</li> <li>Do Week 2 Activity</li> <li>Take the Week 2 Quiz</li> <li>No Wednesday office hours this week</li> </ul>	Due Monday 1/29 11:59pm • Week 2 Activity • Week 2 Quiz
<b>Week 3</b> Jan 30 - Feb 5	Organization of the Nervous System	<ul> <li>Watch/Read Organization of the Nervous System Material</li> <li>Do Week 3 Activity</li> <li>Take the Week 3 Quiz</li> </ul>	Due Monday 2/5 11:59pm • Week 3 Activity • Week 3 Quiz
<b>Week 4</b> Feb 6-12	Action Potentials and Synapses	<ul> <li>Watch/Read the Action Potentials and Synapses         Material</li> <li>Do Week 4 Activity</li> <li>Take Week 4 Quiz</li> <li>Test Respondus (to ensure Respondus is working for next week's exam)</li> </ul>	Due Monday 2/12 11:59pm  • Week 4 Activity  • Week 4 Quiz  • Test Respondus
<b>Week 5</b> Feb 13-19	Exam 1	<ul> <li>Prepare for Exam 1</li> <li>Take Exam 1 (Open Tuesday 12:00am – Monday 11:59pm)</li> <li>Friday office hours will be held on Thursday 2/15, no Monday hours on 2/19</li> </ul>	Due Monday 2/19 11:59pm • Exam 1
<b>Week 6</b> Feb 20-26	Scientific Principles: Evidence-Based Science	<ul> <li>Read What Makes Everyday Scientific Reasoning So Challenging? By Shah et al., 2017</li> <li>Watch Scientific Principles: Evidence-Based Science Lecture</li> <li>Do Week 6 Activity</li> <li>Take Week 6 Quiz</li> </ul>	Due Monday 2/26 11:59pm • Week 6 Activity • Week 6 Quiz
<b>Week 7</b> Feb 27 – Mar 4	The Senses	<ul> <li>Watch/Read The Senses Part 1 and The Senses Part 2 Material</li> <li>Do Week 7 Activity</li> <li>Take Week 7 Quiz</li> </ul>	Due Monday 3/4 11:59pm • Week 7 Activity • Week 7 Quiz

Week 8 Mar 5-11	Spring Break	Spring Break!	Nothing Due		
Week 9 Mar 12-18	Movement & Stress	<ul> <li>Watch/Read the Movement Material</li> <li>Watch/Read the Stress Material</li> <li>Do Week 9 Activity</li> <li>Take Week 9 Quiz</li> </ul>	Due Monday 3/18 11:59pm • Week 9 Activity • Week 9 Quiz		
<b>Week 10</b> Mar 19-25	Scientific Principles: Sources & Neuroscience and Society Project Intro	<ul> <li>Watch/Read the Scientific Principles: Sources         Material</li> <li>Read the Neuroscience and Society Project         guidelines</li> <li>Watch the Neuroscience and Society Project         Video Description</li> <li>Do Week 10 Activity</li> <li>Take Week 10 Quiz</li> </ul>	Due Monday 3/25 11:59pm • Week 10 Activity • Week 10 Quiz		
<b>Week 11</b> Mar 26 – Apr 1	Exam 2	<ul> <li>Prepare for Exam 2</li> <li>Take Exam 2 (available Tuesday 12:00am – Monday 11:59pm)</li> </ul>	Due Monday 4/1 11:59pm • Exam 2		
<b>Week 12</b> Apr 2-8	Emotion, Blood, Feeding and Motivation	<ul> <li>Watch/Read the Emotion Material</li> <li>Watch/Read the Blood and Barriers Material</li> <li>Watch/Read the Feeding and Motivation Material</li> <li>Do Week 12 Activity</li> <li>Take Week 12 Quiz</li> <li>No Monday office hours on 4/8</li> </ul>	Due Monday 4/8 11:59pm • Week 12 Activity • Week 12 Quiz		
<b>Week 13</b> Apr 9-15	Learning and Memory & Sleep and Circadian Rhythms	<ul> <li>Watch/Read the Learning and Memory Material</li> <li>Watch/Read the Sleep and Circadian Rhythms Material</li> <li>Do Week 13 Activity</li> <li>Take Week 13 Quiz</li> </ul>	Due Monday 4/15 11:59pm • Week 13 Activity • Week 13 Quiz		
<b>Week 14</b> Apr 16-22	Scientific Principles: Methods and Emerging Technology & Neuroethics	<ul> <li>Watch/Read the Scientific Principles: Methods and Emerging Technologies Material</li> <li>Watch/Read the Scientific Principles: Neuroethics Material</li> <li>Take Week 14 Quiz</li> <li>Finish and submit Neuroscience and Society Project</li> </ul>	Due Monday 4/22 11:59pm • Neuroscience and Society Project • Week 14 Quiz		
<b>Week 15</b> Apr 23-29	Injury and Disease	<ul> <li>Watch/Read the <i>Injury and Regeneration</i>         Material</li> <li>Watch/Read the <i>Neurodegenerative Diseases</i>         Material</li> <li>Take Week 15 Quiz</li> <li>Study for Exam 3</li> </ul>	Due Monday 4/29 11:59pm • Week 15 Quiz		
Exam 3 (non-cumulative): Open Tuesday Apr 30 12:01am – Monday May 6 11:59pm
