The National Institute of Dental & Craniofacial Research  
National Institutes of Health**

***“NIH research training and career development  
opportunities in biomedical sciences”***

The pursuit of careers in the biomedical sciences can be very exciting and challenging. Progress in the oral health field depends on the availability of a talented, well-prepared, and diverse workforce. National Institutes of Health (NIH) offers a wide variety training opportunities in biomedical research to achieve this goal. National Institute of Dental and Craniofacial Research (NIDCR) supports training and career development programs at NIH for everyone from high school students to independent scientists. We also provide the opportunity to expand your career options in this field. This presentation will provide information about these training programs and resources for successful pursuit of these training opportunities.

**TUESDAY September 5, 2017**

**3:00-4:15 PM**

**Innovation Hall Room 207**
