

Syllabus for PHYS 243 Recitation

Summer 2020

Florin Moldoveanu

Recitations are a required part of PHYS 243; their purpose is to help you solve physics problems and answer your physics questions.

For your recitation grade I will post each week a quiz. For problem solving, I will post videos of me solving relevant problems. For individual help I will hold office hours using Blackboard Collaborate Ultra Tuesdays and Thursdays 10:00am -11:00 am or by appointment.
