

EVPP 490:

PRINCIPLES OF ENVIRONMENTAL LAW

COURSE BY
DR. P. BUBBOSH

FALL 2020

3-CREDITS
ASYNCHRONOUS
ONLINE FORMAT

ROBUST GROUP
INTERACTIONS

Understanding the major environmental laws is a vital component for any career related to the environment. You should familiarize yourself with the boundaries, structure, content, and main issues of all major environmental laws. Law offers many opportunities to defend and advocate for your environmental interests. This course will cover the Clean Air Act, Clean Water Act, Endangered Species Act, hazardous waste laws, toxic and pesticide laws, as well as topics such as enforcement and international environmental laws. You will read landmark environmental law cases, debate timely topics, and understand the basics of law and analysis—all in an on-line format.
