

Sustainable Agriculture Research on Mason's Campus

Donielle Nolan

Doni Nolan works at Mason's Office of Sustainability managing the year-round Hydroponic Greenhouse and two organic gardens on the Fairfax campus. She hosts hundreds of student volunteers every semester (with COVID precautions), to grow lettuce, microgreens, and culinary herbs in the greenhouse, for use in the campus dining halls. She passionately teaches about sustainable food systems in her roles as adjunct faculty, full-time staff, and advisor for several multi-disciplinary projects. Her passion and joy is contagious as she engages and educates the community on how to grow food, compost, and control pests organically. If you would like to get involved with the Greenhouse and Gardens Program, contact Doni at dnolan6@gmu.edu and visit green.gmu.edu or [@greengmu](https://www.instagram.com/greengmu).
