GLOBAL DISCOVERY PROGRAM

HONDURAS
CORAL REEF ECOLOGY, HEALTH, AND CONSERVATION IN ROATÁN

EACH STUDENT RECEIVES A **50% SCHOLARSHIP**, UP TO $1,500; TRAVEL ONLY.

PROGRAM HIGHLIGHTS
- Learn about the geology and ecology of coral reefs during 3-credit Spring 2021 lecture course.
- Explore reefs, island fauna and flora, and the diversity of approaches to conserve reef resources during 1-credit Spring 2021 lab course.*
- Experience field and lab research that marine scientists do to monitor, understand, and protect the health of reef organisms and humans.
- Stay at Anthony's Key Resort in Roatán, Honduras, and participate in Roatán Institute for Marine Sciences program.
- Obtain snorkeling or open water diver certification and scientific diver training for advanced SCUBA divers.

*Concurrent or prior coral reef ecology course required
