

## Sample schedule for BS in astronomy starting with precalculus

This sample schedule is for the case that fall of year 1 is an odd year. (This distinction is necessary because some of the upper-level astronomy courses are offered every other year.)

Number of credits in parentheses.

Courses designated “Elective” are entirely at the student's discretion.

At least 45 credits must be upper-level (300 or above). This sample schedule satisfies this requirement.

Take at least 2 of ASTR 403, 404, 420, 480. In this sample schedule, these are ASTR 404 and 420. Other options are possible.

Beyond the core astronomy, physics, and math courses, an additional 15 credits of astronomy and physics are required. In this sample schedule, these are ASTR 408, 480 and PHYS 306, 402, 428. There are other possibilities.

PHYS 122 is not required. It is included to bring the total credit number to 120.
