

GG560: Quantitative Methods

Instructor: [Ruixin Yang](#)

Exploratory Hall 2409, Tel: 993-3615, E-mail: ryang@gmu.edu

Grayed out words are not applicable in the Spring 2021 semester.

Time & Place: Wednesdays, 4:30 pm-7:10 pm, Exploratory Hall 2312 (online, asynchronous but assuming it is a Wednesday class for schedule purpose)

Office Hours: Tuesdays, 2:30 pm-4:30 pm or by appointment (office phone: 703-993-3615;

Zoom Meeting: <https://gmu.zoom.us/j/4655943637>)

Text Books:

- **Required:** Burt, James E. , David L. Rigby, Gerald M. Barber, 3 edition, 2009: [Elementary Statistics for Geographers](#), Guilford Press, New York, New York. (ISBN-10: 1572304847, ISBN-13: 9781572304840).
- **Recommended:** Wong, D. W. S. and J. Lee, 2005: [Statistical Analysis of Geographic Information with ArcView GIS and ArcGIS](#), Wiley, Hoboken, New Jersey. (ISBN-10: 0471468991; ISBN-13: 9780471468998)

GMU Catalog Entry:

[GG560 - Quantitative Methods \(Credits: 3\)](#)

Survey of quantitative methods commonly used in geographic research. Emphasizes spatial analysis techniques.

Prerequisites: Previous course work in statistics, GGS 310 or 550. Actually, GGS 300.

Goals and Objectives:

To introduce basic descriptive statistics, inferential statistics, and specially the statistical analysis of spatial data. Both understanding and the implementation of the corresponding analysis methods will be covered.

Learning Outcomes:

After successful completion of this course,

1. Students will understand basic spatial data analysis methods;
2. Students will be able to analyze given general data sets and to compute descriptive measures;
3. Students will be able to draw conclusions based on data and inferential statistics.

Course Web Site: Mason Blackboard System at mymason.gmu.edu. You must be familiar with the system for accessing course materials/assignments and for the final project submission.

Computing Requirements: No specific statistical package/tool will be required for assignments in this course. No programming is necessary. A hand calculator with standard algebraic functions (not statistical functions) may be useful. Microsoft Excel with [Excel Analysis ToolPak](#) will be heavily used for instruction purpose and assignments. GIS (ArcGIS) is also needed for some of assignments. However, it is open for students to choose other statistical tools.

Prerequisite Skills: A good comprehension of algebra and basic trigonometry and familiar with Microsoft Excel and ArcGIS. Basic calculus is helpful but not required.

Grading Policy:

Homework Assignments:	65%
Project	35%
Total	100% (Letter grades based on absolute/relative numbers)

Rubrics for assignments and the final projects are provided separately.

The followings are university wide required information from Office of the Provost:

UNIVERSITY POLICIES

- **University Catalog:** The University Catalog, <http://catalog.gmu.edu>, is the central resource for university policies affecting student, faculty, and staff conduct in university academic affairs. Other policies are available at <http://universitypolicy.gmu.edu/>. All members of the university community are responsible for knowing and following established policies.
- **Sexual Harassment:** As a faculty member and designated “Responsible Employee,” I am required to report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s *Title IX Coordinator* per *university policy 1412*. If you wish to speak with someone confidentially, please contact the *Student Support and Advocacy Center* (703-380-1434) or *Counseling and Psychological Services* (703-993-2380). You may also seek assistance from *Mason’s Title IX Coordinator* (703-993-8730; titleix@gmu.edu).
- **Academic Integrity:** GMU is an Honor Code (<http://oai.gmu.edu/mason-honor-code/>) university. Please see the University Catalog for a full description of the code and the honor committee process. The principle of academic integrity is taken very seriously and violations are treated gravely. What does academic integrity mean in this course? Essentially this: when you are responsible for a task, you will perform that task. When you rely on someone else’s work in an aspect of the performance of that task, you will give full credit in the proper, accepted form. Another aspect of academic integrity is the free play of

ideas. Vigorous discussion and debate are encouraged in this course, with the firm expectation that all aspects of the class will be conducted with civility and respect for differing ideas, perspectives, and traditions. When in doubt (of any kind) please ask for guidance and clarification.

- **Mason Email Accounts:** Students must use their MasonLive email account to receive important University information, including communications related to this class. I will not respond to messages sent from or send messages to a non-Mason email address. See <http://masonlive.gmu.edu> for more information on Mason Email System.
- **Office of Disability Services:** If you are a student with a disability and you need academic accommodations, please see me and contact the Office of Disability Services (ODS) at 993-2474. All academic accommodations must be arranged through the ODS, <http://ods.gmu.edu>.
- **Diversity and Inclusion:** Mason, an intentionally inclusive community, promotes and maintains an equitable and just work and learning environment. We welcome and value individuals and their differences including race, economic status, gender expression and identity, sex, sexual orientation, ethnicity, national origin, first language, religion, age, and disability.

OTHER USEFUL CAMPUS RESOURCES:

- WRITING CENTER: A114 Robinson Hall; (703) 993-1200; <http://writingcenter.gmu.edu>
- UNIVERSITY LIBRARIES “Ask a Librarian.” <http://library.gmu.edu/ask>
- Counseling and Psychological Services (CAPS): (703) 993-2380; <http://caps.gmu.edu>

Special notes due to the coronavirus:

1. Activities and assignments in this course will regularly use the Blackboard (Bb) learning system, available at <https://mymason.gmu.edu>. Students are required to have regular, reliable access to a computer with an updated operating system (recommended: Windows 10 or Mac OSX 10.13 or higher) and a stable broadband Internet connection (cable modem, DSL, satellite broadband, etc., with a consistent 1.5 Mbps [megabits per second] download speed or higher. You can check your speed settings using the speed test on <https://www.speedtest.net/>). Actually, almost all lectures and assignments are handled via the Bb system. If the Bb is new for you, please practice on it in the first week of the class.
2. In a special case when the primary instructor becomes ill, an alternate instructor may be assigned.
3. My Google phone number is 571-402-2736

Tentative Course Schedule (will be adjusted during the semester. Last modified on January 21, 2021):
Please consider this as a list of course contents instead of schedule. All efforts will be made to cover as much topics below as possible.

- Week 1: Introduction
- Syllabus
 - Introduction to quantitative methods
 - Math notations
 - Reading Assignment: Chapter 1 (Burt if not stated); Appendix 3a
- Week 2: Univariate Data Display and Description
- Distribution display (histograms)
 - Central tendency
 - Dispersion
 - Higher order moments
 - Reading Assignment: Sections 2.1, 2.2 (up to Page 62), 3.1-3.3
- Week 3: Probability Theory
- Random variables
 - Probabilities
 - Distributions: uniform, and binominal
 - **Project Topic due (2/10)**
 - Reading Assignment: Sections 5.1-5.3 (Page 228); Appendix 5a
- Week 4: Probability Theory (Continued)
- Poisson distribution
 - Normal distribution
 - Sampling
 - Reading Assignment: Sections 5.3 (Page 228)-5.4; Appendix 5b
- Week 5: Basis for Inferential Statistics
- Central Limit Theorem
 - Point estimations
 - Interval estimations (Confidence Interval)
 - Reading Assignment: Chapter 6 (mainly Section 6.5); Chapters 7
 - Reading Assignment: Sections 8.1 to 8.3
- Week 6: Hypothesis Testing
- Method and elements of hypothesis testing
 - Specific tests: Mean test against a fixed value
 - Reading Assignment: Chapters 8
- Week 7: Hypothesis Testing (Continued)
- Specific tests: Two mean test and testing of variance
 - Reading Assignment: Chapters 9
- Week 8: Correlations Analysis
- For interval/ratio data
 - For ordinal data
 - For nominal data (dependence, chi-square test)
 - Reading Assignment: Chapters 4 (4.1-4.3), Pages 486-487, Section 10.5
- Week 9: Linear Regression

- Correlations (nominal, ordinal and interval/ratio)
 - Simple linear bivariate regression
 - **Project outline due (3/24)**
 - Reading Assignment: Section 4.4, 12.2-3, 13.1
- Week 10: Linear Regression (Continued); Spatial Data (Point) Description
- Multiple linear regression
 - Spatial data
 - Spatial central tendency
- Week 11: Spatial Data (Point) Description (Continued); Point Pattern Analysis?
- Spatial dispersion
 - MAUP
 - Standard deviational ellipse
 - ArcGIS toolbox
 - Applications
 - Reading Assignment: Sections 2.4, 3.5 (point data parts only); Appendix 3b and Wong & Lee: Sections 5.3.2
- Week 12: Point Pattern Analysis
- Quadrat analysis (Kolmogorov-Smirnov test)
 - Nearest neighbor statistics
 - Reading Assignment: Section 14.1; Pages 141-142, 401-405; Wong & Lee: Sections 6.1-6.4
- Week 13: Point Pattern Analysis (Continued); Spatial Autocorrelation, Part I
- K-Function (continued from last lecture)
 - Measures for spatial autocorrelation
 - Concept for spatial autocorrelation
 - Spatial weights matrices
 - Reading Assignment: Section 14.2; Wong & Lee: Sections 6.5, 8.1-8.6, 8.11
- Week 14: Spatial Autocorrelation, Part I (Continued) and Part II
- Joint count statistics (for nominal data)
 - Moran's I
 - Reading Assignment: Section 14.2-3; Wong & Lee: Sections 8.7.1
- Week 15: Spatial Autocorrelation, Part II (Continued) and Part III
- G-statistic
 - Local Indicators of Spatial Association (LISA)
 - Local Moran's I
 - Local G-statistic
 - Bivariate spatial autocorrelation
 - HW#11 due
 - Miscellaneous Topics and Catching-up (May be skipped)
 - Regression with Spatial Data
 - Geographically Weighted Regression (GWR)
 - Linear Features
 - Reading Assignment: Section 14.3; Wong & Lee: Sections 8.7.3, 8.8, 8.10
- Week 16: **Final Exam Week: (Thurs. 5/5)**
- Project due
 - All late HW assignments for consideration due
